

PROCESS FOR MANUFACTURING A CELLULOSIC
PAPER PRODUCT EXHIBITING REDUCED MALODOR

ABSTRACT OF THE INVENTION

5 A process for manufacturing a cellulosic paper product
is provided. The process comprises forming an aqueous
suspension of papermaking fibers; introducing sodium
bicarbonate into the aqueous suspension; depositing the
aqueous suspension onto a sheet-forming fabric to form a wet
web; and dewatering and drying the wet web. The process of
10 the present invention provides cellulosic paper products
exhibiting a reduced malodor upon re-wetting.
